

STONEWORKS OF ART[®]

HOME OF
TrimStone[®]

Good day and thank you for your inquiry on our Trimstone[™] panels. Made from natural stone slabs uniquely strengthened by epoxy and aluminum honeycomb, Trimstone[™] panels are ideal for floors, ceiling, walls or outside cladding. All panels are 5/8" thin, constructed of 1/2" aluminum honeycomb and 1/8" natural stone.

BENEFITS

THIN. Our versatile, marble panels fit in all applications where there might be a thickness restriction.

LIGHTWEIGHT. Weighs approximately 80% less than regular 3/4" marble slabs.

EASE OF INSTALLATION. Imagine installing large slabs weighing a couple of pounds per square foot.

IMPACT RESISTANT. The aluminum honeycomb structure provides both strength and flex power.

LESS COSTLY SHIPPING. Due to panels' lightweight, freight, crating and handling charges are less costly.

MULTIPURPOSE USES. Slab-sized or cut-to-size pieces can be ordered based on your job specifications.

YOUR MATERIAL OR OURS. We can process slabs or blocks shipped to us or you can select from our inventory of materials.

FINISHES

- Polished
- Honed

Call our office at 800 992-1167 for accurate pricing on your stone needs. Cut to size and custom waterjet cuts are available. Ask our sales associates.

TRIMSTONE[™] PRICING USING CLIENT'S MATERIALS

We can also use your slab material to make 5/8" Trimstone[™] panels. Stoneworks of Art is able to cut your 3/4" slab into 2 slabs, creating a perfect book match.

Requirements:

1. Slab thickness can't be less than 3/4" (2cm). This needs to be measured for accuracy. The measurement can't include any fiberglass in the back of the slab.
2. The stone can't be too translucent, otherwise when cut, you might be able to see the aluminum honeycomb through the stone.
3. Slab has a maximum height of 61". If the slab is taller, we will have to cut it to 61".

Cost to make 5/8" Slabs

<u>MARBLE</u>	\$34.00 / SF	1 Trimstone [™] slab from 1 3/4" slab
	\$68.00 / SF	2 Trimstone [™] from 1 3/4" slab (Book matching)
<u>GRANITE</u>	\$43.00 / SF	1 Trimstone [™] slab from 1 3/4" slab
	\$86.00 / SF	2 Trimstone [™] from 1 3/4" slab (Book matching)

NOTE: If cutting 2 slabs from 1 be sure the slab is no less than 3/4" thick without fiberglass. Anything less will not be able to be split in half.

On some circumstances where certain requirements are met, we are able to make 3/8" thin panels. Feel free to reach us if you have any questions or special requests.

Stoneworks of Art reserves the right to modify material selections and prices without prior notice. Contact our office for other available materials and special requested. Slab sizes will vary depending on material selection.
